If you or someone in your home has or is suspected of having COVID-19, here are some ways to safeguard against the spread.

- Stay in another room or be separated from the person as much as possible. Use a separate bedroom and bathroom, if available.
- Make sure that shared spaces in the home have good air flow. Turn on an air conditioner or open a window.
- Wash your hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer that contains 70 to 95% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Use soap and water if your hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.

Extra precautions:
- You and the person should wear a face mask if you are in the same room.
- Wear a disposable face mask and gloves when you touch or have contact with the person’s blood, stool, or body fluids, such as saliva, sputum, nasal mucus, vomit, urine.
  - Throw out disposable face masks and gloves after using them. Do not reuse.
  - First remove and throw away gloves. Then, immediately clean your hands with soap and water or alcohol-based hand sanitizer. Next, remove and throw away the face mask, and immediately clean your hands again with soap and water or alcohol-based hand sanitizer.
- Do not share household items such as dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items with the person who is sick. After the person uses these items, wash them thoroughly.
- Clean all “high-touch” surfaces, such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, every day. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe.
- Wash laundry thoroughly.
  - Immediately remove and wash clothes or bedding that have blood, stool, or body fluids on them.
  - Wear disposable gloves while handling soiled items and keep soiled items away from your body. Clean your hands immediately after removing your gloves.
- Place all used disposable gloves, face masks, and other contaminated items in a lined container before disposing of them with other household waste. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after handling these items.
